

## LIST OF FIGURES

| <b>Figure No.</b> | <b>Title</b>                                                                                                                 | <b>Page No.</b> |
|-------------------|------------------------------------------------------------------------------------------------------------------------------|-----------------|
| <b>Figure 1:</b>  | Kaggle Dataset (Dataset page or CSV preview)                                                                                 | 17              |
| <b>Figure 2:</b>  | Static 2D Radiation Heatmap Output Generation with Dataset                                                                   | 18              |
| <b>Figure 3:</b>  | Live GPS Data Terminal Output                                                                                                | 20              |
| <b>Figure 4:</b>  | Gamma Spectrometer Setup, Co-60 and Cs-137 Radiation Testing                                                                 | 21              |
| <b>Figure 5:</b>  | Gamma Spectrum / Peak Detection Graph with Metrics and Radiation Intensity 2D Dynamic Heatmap Generation on real-time basis. | 22              |
| <b>Figure 6:</b>  | 3D Digital Twin Visualization                                                                                                | 23              |
| <b>Figure 7:</b>  | Overall Architecture of the RADMAP System                                                                                    | 25              |
| <b>Figure 8:</b>  | 3D Printed Prototype / CAD Model                                                                                             | 26              |
| <b>Figure 9:</b>  | Final RADMAP Prototype Model                                                                                                 | 28              |

## LIST OF TABLES

| <b>Table No.</b> | <b>Title</b>                                              | <b>Page No.</b> |
|------------------|-----------------------------------------------------------|-----------------|
| <b>Table 1:</b>  | Hardware Requirements                                     | 16              |
| <b>Table 2:</b>  | Software Requirements                                     | 16              |
| <b>Table 3:</b>  | Real-Time GPS Receiver Output (GlobalSat BU-353N)         | 29              |
| <b>Table 4:</b>  | Session Summary of Gamma Spectrometer                     | 30              |
| <b>Table 5:</b>  | Detected Photo peaks (Channel-wise) of Gamma Spectrometer | 30              |
