

AMITY UNIVERSITY

AMITY INSTITUTE OF INFORMATION TECHNOLOGY

WEEKLY PROGRESS REPORT
FOR THE WEEK COMMENCING (18/05/2026-24/05/2026)

WPR No: 01

Program: MCA

NAME: DHRUV DHAYAL

ENROLLMENT NO.- A010145025215

SEMESTER: 3rd

FACULTY GUIDE NAME: Dr. Garima Bohra

PROJECT TITLE: RADMAP – GPS Enabled Radiation Mapping Prototype
using Raspberry Pi

TARGETS FOR THE WEEK:

1. Understanding the visualization workflow and radiation mapping requirements of the RADMAP project.
2. Developing a 2D heatmap generation system for radiation data representation.
3. Designing a 3D mapping model using GPS coordinates and radiation values.
4. Building a user interface for displaying radiation and location-based data.

ACHIEVEMENTS OF THE WEEK:

1. Successfully developed a 2D heatmap for radiation intensity visualization.
2. Implemented a 3D radiation representation model using manually collected GPS coordinate data.
3. Developed a dynamic radiation mapping system where radiation values update according to changes in GPS location.

4. Designed and integrated a complete user interface with location selection, tabular data structure, and radiation information display.
5. Successfully structured and visualized radiation data for improved monitoring and interpretation.

FUTURE WORK PLANS:

1. Integrating real-time GPS data with the radiation visualization system.
2. Improving the accuracy and responsiveness of dynamic radiation mapping.
3. Enhancing the UI with additional analytics and interactive features.
4. Testing system performance with real-time radiation and location datasets.
